

## 2018 TOYOTA CAMRY ORDERING INSTRUCTIONS

When ordering interiors for the new 2018 Toyota Camry, it's necessary first to identify the vehicle's origin. Toyota manufactures the Camry both in Japan and at two plants in the U.S., using interiors unique to each factory. Because Katzkin interiors are precisely engineered for a perfect factory fit, interiors ordered for a U.S.-built Camry will not fit the seats in a Japan-built Camry, and vice versa. To ensure you are ordering the right interior, you must refer to the vehicle's VIN plate, located on the driver side door jamb, before placing your order. If you do not have access to the vehicle, you must still obtain the VIN to determine which interior to order.
