TOPIC: Door Panel Installation

VEHICLE: Ford Mustang

STEP 1 – Peel foam away
from vinyl & set aside

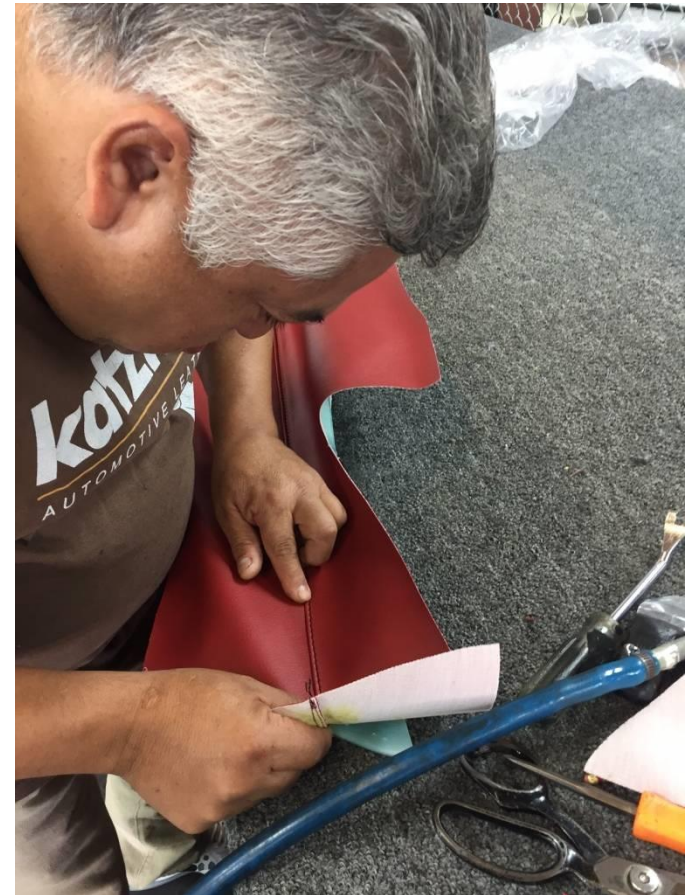

Step 2 - Glue the top half of the panel.

Step 3 – Glue the top half of the door panel and install just the top half.

Make sure you line up the the seam along the channel.

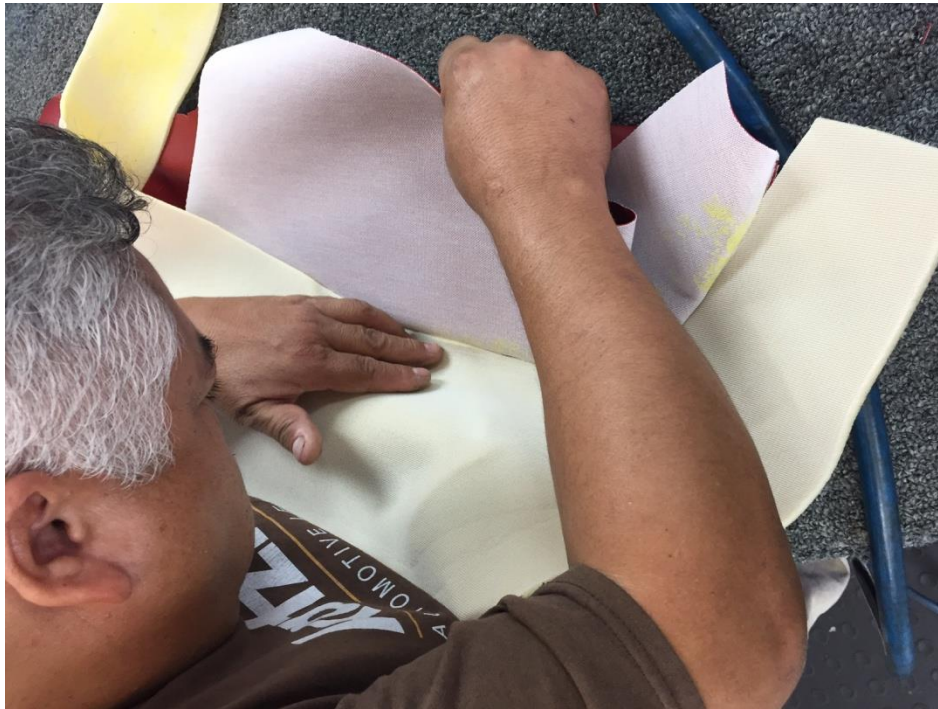

Step 4 – Glue the foam piece

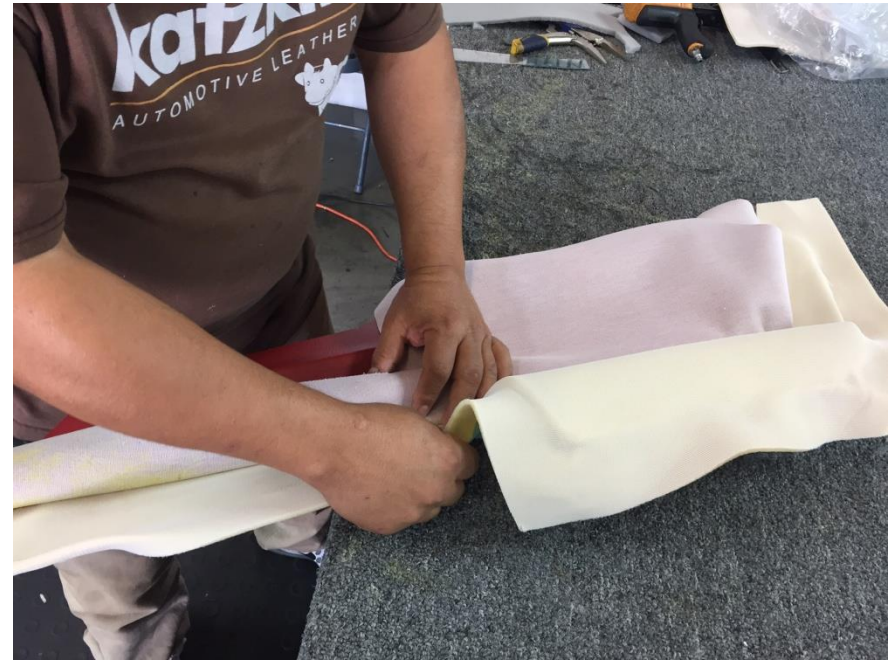

Step 5 – Apply the glue to the bottom half of the door panel

Step 6 – Install the foam piece to the bottom of the door panel.

Align the foam to the channel as you go.

Step 7 – Glue the foam over the edge of the panel.

Step 8 – Glue the bottom half of the vinyl

Step 9 – Install the vinyl over the foam and smooth out wrinkles..

Step 10 – Trim off excess material on the back.

Finished panel insert should look like this.

Step 11 - Attach insert back into the door panel using tap screws.

Finished door panel should look like this.
